SUMMARY

Passionate Software Engineer with 3+ years of experience in developing web applications and backend systems. Skilled at writing clear, concise code that is easy to maintain and troubleshoot. Experienced in working with both small and large teams across multiple projects and a pair of companies. Able to work independently of remote locations or in office environments as needed by the company.

PROFESSIONAL EXPERIENCE

Software Engineer

CocinasPlus Design

2021 - Present | Mijas, Málaga, Spain

- Successfully upgraded an outdated website to a modern, standards-compliant, and responsive design.
- Scripted unique test plans, test scripts and processes to remove previously known redundancy by 60% and ensured predictable outcomes
- Developed a desktop application to automate database testing process, improved efficiency by 75%
- Automated many costly processes that were previously handled through subscription service payments and integrated various APIs from other subscriptions to optimize them for internal company use, saving the company's technicians many hours of work

Junior Software Engineer

Check-in scan

2021 - 2021 | Austin, TX

- Configured various JavaScript forms that interacted with our system's database, executing different calls to external APIs and creating web microapplications. This initiative enhanced our operational efficiency by streamlining data processing and enabling dynamic user interactions within our web infrastructure.
- Implemented various enhancements across different sections of the website that required more efficient updates, including making many parts responsive and improving the user experience. Through these improvements, sales increased by 55%

1998 - 2003 | Rocky Mount, NC

ACHIEVEMENTS

Developed an AI-based identifier project

for identity document fields, enhancing document processing efficiency.

Automated all internal team processes

integrating various platforms, saving 50% of work hours for a 15-person team.

Optimized a MySQL customer and product database

containing over 13,500 items, making it more agile and manageable

Improved office morale

by relaxing the environment and creating meetups and gathering points among colleagues, which in turn increased team productivity.

STRENGTHS

Innovative Problem Solver

Demonstrated through the development of an AI-based document field identifier and the optimization of a significant MySQL database. This strength highlights your ability to tackle complex technical challenges with creative and effective solutions.

Efficiency Expert

Proven by automating internal processes and integrating platforms, which halved the workload for a sizable team. Emphasize your knack for streamlining operations to maximize productivity and reduce unnecessary labor.
